My favorite teacher is Mr. Allen, he was my seventh and eighth grade social studies teacher. He is my favorite teacher because he makes class fun and interesting. I believe that when you have a fun class or funny teacher it makes it easier to remember the information given. Also, I like the word choice way class is organized its always, for the most part, the same therefore I know what to expect. I always used to dislike social studies and when you don't like a subject you tend to fall behind, even the slightest bit. Now that social studies is fun I remember the information and excel in that subject.
